

Kew Dental Care

Welcome to our latest newsletter

We have been busy this year and in this edition, you'll be able to read about the many new exciting developments at our practice over the past few months.

We recently said goodbye to our lovely Wednesday hygienist, Rose, who is now working closer to her home. We have managed to fill this gap with our very own Nicole, who many are already familiar with.

We're delighted to have Frances, our lovely receptionist back from Maternity leave. She will be returning part time, working Monday to Wednesday.

As always, we are very grateful for your support. If you have any questions or worries, please do not hesitate to contact us! Additionally you can visit our website at www.kewdentalcare.co.uk for further information. We will also be launching our Instagram page very shortly, so please give us a follow @kewdentalcare105!

Merry Christmas and a Happy New Year from everyone at Kew Dental Care!

Dr. Sinead Hill

BDS (Hons), GDC 311444

Meet the newest member of our team – our skilled dentist who's not just about perfecting your smile but also enhancing your natural beauty through facial aesthetics! Get ready for a personalised touch that goes beyond traditional dentistry. With her expertise in facial aesthetics, our new dentist is here to help you achieve a harmonious balance between dental health and a refreshed, confident appearance.

Sinead completed her degree in Dentistry from the prestigious Trinity College Dublin passing with distinction. She has a vast array of experience having worked in Facial Aesthetic Clinics, busy Private Dental Practices and delivering Emergency Dental Care for the HSE.

Please get in touch if you would like to know more or would like a complimentary consultation with Sinead to discuss your goals and treatment options. As a special introductory offer, we will be offering 10% off any facial aesthetic treatments booked in with Sinead for the month of December.

I can't wait to get started!

Hi there, My name is Sinead and I am a Dentist. I graduated from Trinity College Dublin with an honours degree and after studying facial anatomy in great detail it ignited a passion for facial aesthetics within me.

As a general and cosmetic dentist I am always observing facial symmetry and harmony, and this naturally led me to practicing facial aesthetics. I have completed facial aesthetics training in both Ireland and the UK specialising on

basic and advanced anti-wrinkle treatments, dermal filler treatments, prophylo and medical grade skin care.

Each patient's journey will be unique to them and will always start with a full

consultation where we can discuss your goals, queries and possible treatment options. I truly believe that subtle, natural enhancements can be achieved with the smallest and most non-invasive treatments.

I really look forward to meeting you in our clinic!

Introducing New Innovative Technology

Over the past few months, we have invested heavily in new technology at the practice. Although there is no substitute for good clinical skills, the new equipment we have will offer less invasive and more comfortable procedures, minimizing discomfort and maximizing patient satisfaction! Below is a little more detail on each.

EMS Master Unit

We have had our EMS machine at the practice for a few months now and have received brilliant feedback from all of you! Here are some of the great benefits of this:

1. Thorough Cleaning and Stain Removal: With a unique combination of airflow, ultrasonic scaling, and micro vibrations to remove stubborn plaque, tartar, and stains from your teeth and gum line. This comprehensive approach ensures a gentle and thorough cleaning experience.
2. Enhanced Comfort: EMS uses warm water technology making it suitable for individuals with sensitive teeth, who often struggle with traditional scaling procedures.
3. Improved Gum Health: EMS uses GBT (Guided Biofilm Therapy) to remove all plaque and bacteria more effectively, thus reducing the spread of gum disease.
4. Benefits for Braces and Children: Cleaning is quicker, more thorough, and gentler, even in areas that are difficult to reach.

i-Tero Element 5D Plus

The iTero scanner is a digital impression system used in dentistry to create highly accurate 3D scans of a patient's teeth and oral structures. It replaces traditional physical molds, offering a more comfortable and efficient process for both dental professionals and patients. The digital scans generated by the iTero scanner are used in various dental applications, including orthodontics, prosthodontics, and restorative dentistry.

Advantages of digital dentistry are:

1. Comfort: More comfortable for patients- especially those with a sensitive gag reflex. No more gooey impressions!
2. Reduced inaccuracies: Digital scans can be sent to labs immediately and 3D models of your teeth printed
3. Reduced time: Appliances can be made quicker.
4. Monitoring: Allows quantitative monitoring of changes in teeth/oral structures- great for monitoring tooth wear due to clenching/grinding.

Facial Aesthetics at Kew Dental Care!

At Kew Dental Care, we go beyond perfecting smiles; we enhance overall facial aesthetics. Our approach is centered on achieving subtle, natural enhancements through the use of minimally invasive treatments.

Anti - wrinkle Treatment

What is Profhilo?

Profhilo is a unique injectable treatment designed to rejuvenate the skin by addressing skin laxity and improving overall skin quality. Unlike traditional dermal fillers or anti-wrinkle injections, Profhilo contains a high concentration of hyaluronic acid, a substance naturally found in the skin, which helps in maintaining hydration, elasticity, and volume.

The benefits of Profhilo include:

1. **Skin Hydration:** Profhilo deeply hydrates the skin, improving its overall moisture content. This hydration can help restore a more youthful and radiant appearance.
2. **Skin Laxity Improvement:** By stimulating collagen and elastin production, Profhilo helps to tighten and firm the skin, reducing the appearance of fine lines and wrinkles.
3. **Improved Skin Quality:** It enhances skin texture and elasticity, leading to
4. **Natural-Looking Results:** Profhilo is known for its ability to provide subtle and natural results. It works by boosting the skin's natural processes, allowing for gradual and natural improvements in skin quality over time.
5. **Long-Lasting Effects:** While individual results may vary, the effects of Profhilo are typically long-lasting, with improvements lasting for several months after treatment.

Profhilo products are labelled as skin boosters and can be used alongside other aesthetic treatments, such as dermal filler treatments. Due to its gel-like consistency, Profhilo distributes smoothly and evenly without the formation of any lumps, so it can be used on areas that are difficult to treat, such as the neck and forehead.
